#### Department of Water Resources (DWR)

- PPE Need - DWR currently looking for N95 masks for our essential workers in/near the fire areas (Quantity to be requested pending). Basic face coverings are insufficient due to the air quality.
- There are no major impacts to DWR facilities or issues impacting water delivery.
- DWR continues to monitor progress of the SCU fire moving towards two (2) DWR sites; the fire is currently seven (7) miles south of Del Valle pumping plant at Del Valle reservoir and about five (5) miles north of San Luis reservoir. The fire weather forecast of extreme winds and thunderstorms present elevates risk at multiple locations including loss of power to check stations on the California aqueduct due to de-energized or fire damaged to power grids, in addition to the elevated fire threats.
- DWR is working closely with CAL FIRE to include DWR critical infrastructure in their operations plans.

### Air Quality Index Map (airnow.gov) – California Environmental Protection Agency (Cal EPA)

The California Air Resources Board (CARB) continues to host smoke monitoring coordination calls with the affected air district and air quality agencies. CARB deployed 36 air monitors throughout the state to support local air quality agencies. CARB will continue to develop plans and schedule air-monitoring deployments as needs and resources are identified.

- Cal EPA and CARB coordinated a Mission Task to deploy one (1) Air Resource Advisor to Northern Sonoma County Air Pollution Control District (APCD) to support the LNU Complex Fire. [A United States Forest Service Air Resource Advisor has been assigned to the LNU Fire and arrived in Sonoma County on August 26, 2020.](#)
- Based on the PM2.5 and ozone Air Quality Index (AQI) reported, communities in the South Coast, San Joaquin Valley, San Francisco Bay Area, and Sacramento Valley had air quality in the moderate to unhealthy range. Today there is expected improvement of air quality in the majority of areas affected by the fires.
